INOVANCE

About Inovance

The Inovance Group, founded in 2003, is a rising star in the global industrial automation market and generated revenues of \$3.4bn in 2022. The company's flexible production techniques and expert understanding of all industry sectors – from plastics to printing to packaging to iron & steel production – have allowed it to establish world-leading industry-specific business units. Over the years, Inovance has built an engineering team with specialist expertise in industrial automation. This knowledge allows it to form strong partnerships with OEMs and end users, providing ongoing advice about how to get the most out of their automation solutions today, and how to be prepared for the market and technological changes of the future.

No.8
for LV AC drives
globally in 2021*

Inovance is headquartered in Shenzhen, China, and has built a global operation, with offices and facilities in Germany, France, Italy, Spain, Turkey, India, and South Korea. The company also has a strong network of distribution partners around the world.

Global R&D network

Inovance invests heavily in R&D, enabling the company to release a steady stream of new and innovative products. To ensure that all products meet key global standards wherever possible, Inovance's R&D teams in Europe, India and China, all work together seamlessly and virtually on engineering projects. Inovance calls this co-development, and the practice ensures the best technology, knowledge, and solutions can be gathered from all around the business; and that they are always implemented and adapted in a way that meets the needs of local markets. The company's commitment to innovation is demonstrated through its headcount: over 20% of Inovance's entire global workforce is in R&D.

Salt spray test

EMC surge testing

Conducted emissions testing

Highly accelerated life testing

Semi-anechoic chamber

Vibration & shock testing

Dustproof test

Thermal simulation

World-class manufacturing

Inovance's advanced global manufacturing facility is ISO 9001 certified and follows continuous improvement principles to achieve world-class standards. Production lines are highly automated, with the company making use of the latest smart manufacturing techniques and industrial IoT technologies in its own factories. Regular manufacturing assessments and upgrades make sure the most efficient processes are always in place, and rigorous inspection techniques ensure world-class quality.

Quality assurance

Inovance uses a uniquely rigorous engineering process that includes advanced quality assurance techniques. R&D teams carry out robust integrity testing of all technologies, and the company maintains a world-leading array of in-house testing facilities. These include XYZ vibration test rigs, walk-in climate chambers and a highly accelerated life test (HALT) chamber. Inovance also maintains research, EMC and LVD test labs which are certified and accredited by TÜV Rheinland and TÜV Süd in accordance with ISO/IEC 17025 and ISO 9001.

International Certifications

Inovance's products comply with all major international safety certifications and standards, such as CE, UL and EAC. The company works with UL listed test labs and various safety bodies for Type Test certifications, and also participates in UL's Client Test Data Program (CTDP). Meanwhile, Inovance's R&D teams work with leading international testing bodies such as TÜV Rheinland and TÜV SÜD for functional safety. The company is accredited under the Customer Testing Facility (CTF) program run by TÜV Rheinland, as well as the Acceptance of Client Testing (ACT) program run by TÜV Süd.
